

# SAFETY

## ~~SECONDARY LOADS~~ ~~ALERT!~~

Unsecured loads, in the event of an accident, become projectiles. Simply stated, the vehicle stops, the load keeps going – and you do not want to be in the way!

Does your loading and unloading plan include:

- Designation of persons to execute plan?
- Times and locations for loading and unloading?
- Orders not to load troops in vehicles with fuel or hazardous cargo?

Supervise cargo loading to ensure load is secured and weight is correctly distributed (especially when traveling over sandy terrain).

**IMPORTANT:** We see a lot of instances where soldiers **load fuel cans on the back of tactical vehicles**. In rear-end collisions, this can cause fires and even explosions. **DON'T BECOME A STATISTIC!**
